ABSTRACT

Results of a 1979-1980 survey of foreign students in the United States are presented. The survey, which accompanied the Annual Census of Foreign Students in the United States, studied country of origin, field of study, academic level, sex, and age of foreign students. Of the 2,651 institutions that reported foreign students, 1,961 or 74 percent provided the additional data, reporting on 160,840 individual students. The data indicate a pattern of growth in the foreign student population. The distribution and age/sex of these students, along with information on students from leading countries within each world region since 1949-1950, are detailed. Data on the field of study choices by foreign students and their academic levels indicate that engineering and engineering technologies were chosen by 25 percent of all students, compared to business and management (15.9 percent), social science (9.1 percent), or natural and life sciences (8.3 percent). Forty-five percent of the sample were enrolled in bachelor's degree programs, while 35.9 percent were in graduate programs, 13 percent in associate degree programs, and 6 percent in nondegree programs. The overall ratio of men to women among foreign students was 73.4 to 26.6 percent, and 40 percent of the sample were 22 years old or younger. Appended materials include a comparison of numbers of students found by the additional survey and the Annual Census, a list of responding institutions, field of study and country taxonomies, and a questionnaire. Guidelines for the Release of Census Data

Reports based on census data are available to individuals, agencies or corporations for clearly identified purposes of scholarly research, public information or recruitment for employment.

Reports will be produced for recruitment purposes only when the employer has indicated that: the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Student names obtained as a by-product of the census activity will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of the data be documented and to withhold census data when the request is not deemed to be for appropriate scholarly, public information or recruitment purposes.

The Institute of International Education (IIE) was founded over half a century ago to promote peace and understanding through educational and cultural exchanges. At present it is the largest not-for-profit organization in this field.

Among the services made possible through contributions are free information and counseling, student hospitality programs, a research and reference library, conferences/seminars, an overseas application information service, and publications relating to the field of international education. Contributions to the Institute are tax-deductible.

The Institute fulfills its mission through its services to sponsors—foundations, corporations, governmental agencies, and international organizations—and through its services to educational institutions and the general public. Services to its sponsors are self-supporting; services to educational institutions and the general public are made possible through contributions from individuals, foundations, and corporations.

The IIE publication, *Open Doors: 1979/80*, was used in the production of some sections of *Profiles* and can be purchased from the Communications Division, IIE, for $20.00.

The Statistical Research Division (SRD) of the Institute conducted the Annual Survey of Foreign Students with the guidance of the Interassociational Committee on Data Collection (ICDC). The SRD can produce special reports from the data base for scholars and others interested in international educational exchange. For further information and charges contact Douglas Boyan, Manager, Statistical Research Division, IIE.

FOREWORD

IIE is pleased to launch a new series called *Profiles*, which will report the results of research on specific aspects of international educational exchange. It is part of a new effort by the Institute's Department of Program Development and Research to provide a better basis for objective assessments of international education.

Profiles complements *Open Doors*, IIE's annual report on foreign students in the United States, now in its 27th year. *Profiles* provides a detailed examination of basic information presented in *Open Doors*. Future editions will focus on specific geographic regions, on curriculum choices, on aspects of financial support, and other key concerns in the field.

This edition of *Profiles*, "The Foreign Student in the United States," offers a detailed description of the foreign student population in the United States. It provides, for the first time in many years, information on field of study, academic level, sex, and age of students from each country.

This data, in combination with historical information from IIE surveys since 1949, offers an overview of the impressive growth of the foreign student population in the United States. The reader can follow the evolution of the profile of students from each world region and is given a clear picture of the variations in students from different geographical areas.

We believe that *Profiles* is a valuable new resource for the field of international education.

Wallace B. Edgerton
President,
Institute of International Education

ACKNOWLEDGEMENTS

To the thousands of men and women of the National Association for Foreign Student Affairs (NAFSA) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO), who spent many hours in addition to their usual work on the Annual Census to provide the extra detailed level of data needed to produce this book;

to the Bureau of Educational and Cultural Affairs of the U.S. International Communication Agency and, in particular, to Stanley A. Nicholson, Director of Academic Affairs, and Mary Ann Spreckelmeyer, Chief, Student Support Services, whose guidance and support made the STEP 3 data collection and this edition of *Profiles* possible;

to Leo Goldstone of the U.N. Statistical Office and consultant to IIE, who provided assistance in the design of the STEP 3 survey and made a substantial contribution to the design of this edition;

to Yoram Gelman, computer consultant to IIE who, with the cooperation of IIE's data processing staff, designed and implemented the complex programs needed to use the vast amount of data on which this book is based;

to Alfred Iulian, Statistical Research Assistant at IIE, for his substantial efforts in the production of this book;

to Ruth Jass and Clifford Sjogren, past and present Presidents of AACRAO; Wallace B. Edgerton, President of IIE; and Stirling L. Huntley and Dixon C. Johnson, past and present Presidents of NAFSA, for their support and encouragement;

to these and the many other people who assisted in the preparation of this book we express our gratitude.

DEFINITIONS

Foreign Student

A foreign student has been defined as anyone who is enrolled in courses in the United States who is not a citizen or an immigrant (permanent resident). Refugees are included.

Higher Education

In respect to the United States, "Higher Education" is used to describe the group of colleges and universities listed in the *Education Directory, Colleges and Universities—1978/79*. Printed by the U.S. Government Printing Office, it is National Center for Education Statistics document No. 79-310.

Fields of Study

The fields of study used in this document are those from *A Taxonomy of Instructional Programs in Higher Education;* also published by the NCES. See Appendix 4 for the list of fields.

Regions

The countries and territories included under each major region are listed in Appendix 5.

1.1 Type of Response to Survey, 1979/80

Type of Response	1979/80*

1. THE "STEP 3" SURVEY

This edition of *Profiles* reports on a survey of foreign students conducted during the fall of 1979 and spring of 1980. This survey accompanied the Annual Census of Foreign Students in the United States as an additional step, "STEP 3", asking for data on an individual student basis.

The additional step was designed to collect data which would provide more knowledge on the profile of the foreign student in the United States. Annual Census data is reported on an *institutional* basis (see *Open Doors: 1979/80*, Institute of International Education: New York, 1981), permitting an institution to report easily on its foreign student population. However, this does not allow for the correlation of data on the different survey fields requested: it tells us the number of Nigerians, engineering students, sophomores, and females, for example, but does not reveal the number of Nigerian female sophomores studying engineering.

In the spring of 1979, the Interassociational Committee on Data Collection (ICDC) approved the inclusion of an individual (or correlated) data survey to accompany the Annual Census in the fall of 1979. The survey (see Appendix 6 for sample form) asked each institution to provide individual student information on the following fields: country of origin, field of study, academic level, sex, and age. While additional categories were considered, concern over the institutions' ability to respond dictated their ommission.

As **Table 1.1** indicates, the response to this survey was gratifying. Of the 2,651 institutions which reported foreign students to the Annual Census, 1,961 or 74.0% provided STEP 3 data. These institutions reported on 160,840 individual students—56.2% of the 286,343 foreign students reported in the Annual Census. (Appendix 3 lists all institutions responding to the Annual Census and the STEP 3 Survey.)

While a fifty-six percent sample is more than adequate for analytical purposes, a breakdown by major response categories revealed that the STEP 3 Survey data was representative of the Annual Census distribution in all major categories. **Table 1.2** summarizes that comparison.

Table 1.3 shows the percentage response to the survey by world region for the four major fields requested. It shows that three of them—field of study, academic level, and sex—were provided in over ninety percent of the nationality responses. The fourth field, age, was provided for approximately sixty percent of the students for whom country of origin was provided.

Because of the slightly differing response rates shown in **Table 1.3** (field of study for 95.0% of the responses versus 90.6% for sex), the distribution of the grand totals may differ nominally from one table to another depending on the combination of characteristics used in each. Thus, in a table of field by region (e.g., **Table 3.1**), the bottom line shows 15.9% of all students in business and management, while a table of academic level by field (e.g., **Table 7.4**) shows a comparable figure of 16.1%. These marginal differences have not been rounded so that the user is provided an accurate yardstick by which to compare the data *within* each table. Total distribution figures for each major characteristic are summarized in tables and text at the beginning of each section of this book.

This book is divided into seven sections plus appendices. Section 2 reports on the nationality of foreign students in the United States based on Annual Census data reported in *Open Doors: 1979/80*, focusing on the regional and national subdivisions used in the subsequent sections. Sections 3-6 examine field of study, academic level, sex, and age distributions by region/country of origin, and section 7 provides data on field of study distribution by academic level. All STEP 3 data are provided in percentage terms which may, of course, be used in conjunction with the Annual Census data provided in section 2.

Appendix 1 provides a comparison of Annual Census numbers with STEP 3 numbers of students from each country reported. Appendix 2 provides a complete breakdown of STEP 3 data by each country with both numbers and percentages for field of study, academic level, sex, and age. Appendix 3, as previously mentioned, lists all institutions responding to the two surveys; and Appendices 4-5 give field of study and country taxonomies respectively.

2. NATIONALITY

The total number of foreign students reported in 1979/80 in *Open Doors* was 286,343, an 8.3% increase over the 263,938 students reported in the previous year. As **Table 2.1** indicates, this increase continues a pattern of growth in the foreign student population observed in the Annual Census of Foreign Students—a more-than-tenfold increase over the past thirty years.

The distribution of these students among the world regions is detailed in **Table 2.2.** This shows that in 1949/50 three world regions sent the largest numbers of students to the United States—Asia, Europe, and Latin America—with more than one-quarter of all foreign students coming from South and East Asia. The percentage of foreign students from South and East Asia continued to rise, reaching 39.0% of reported foreign students by 1970/71. This region had the highest percentage reported until 1979/80, when the increasing numbers from the Middle East made that region the largest.

The number of students from the Middle East has grown dramatically in recent years. In the twenty-five years from 1949/50 to 1973/74, the percentage of students reported from this region rose from 8.4% to 12.2%. Since that time it has exploded to 29.2%. In absolute terms, the number of students from this region expanded from 18,381 to 83,700—an almost 500% increase over six years.

Other changes over this period include the steady increase in the percentage of students from Africa, while the percentages of all foreign students from Europe, Latin America, and North America have declined.

The numbers of students from leading countries within each world region since 1949/50 are detailed in **Table 2.3**. This table illustrates the important role of the leading countries within each region, most clearly demonstrated by Iran in the Middle East and Nigeria in Africa.

3. FIELD OF STUDY

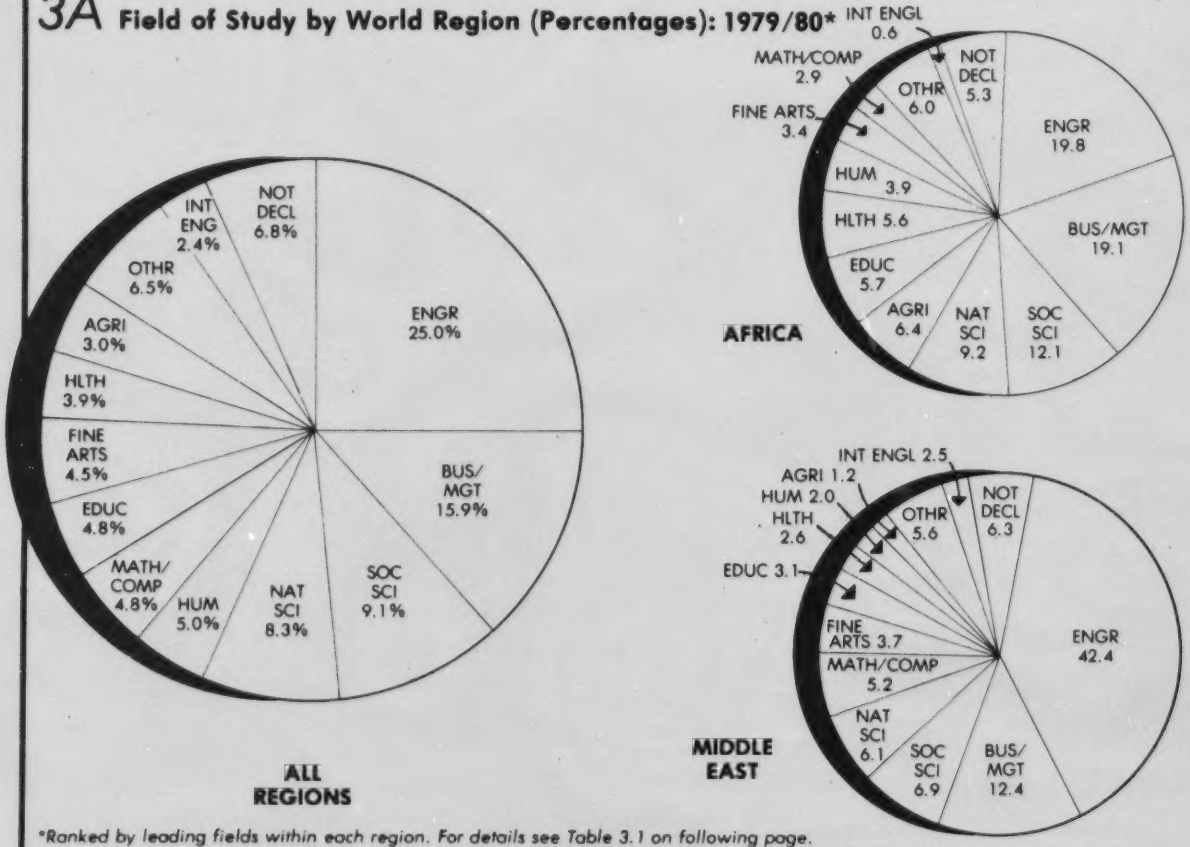
The field of study choices by foreign students in the United States are shown in **Table 3.1** (details on field of study breakdown are provided in **Appendix 4**). This table indicates that engineering and engineering technologies are chosen by one-fourth of all students—far more than chose the next largest area, business and management (15.9%). Far smaller percentages of foreign students chose the third most popular field, social science (9.1%), and natural and life sciences (8.3%).

A breakdown of foreign students by field of study choices within regions for 1979/80 is provided in **Table 3.1.** This table shows some significant differences in the field of study choices by students from different world regions. Most notable is the substantially higher percentage of Middle Eastern students studying engineering, 42.4%, over twenty percentage points higher than any other region. Also apparent in this table are the higher percentages of Africans and Latin Americans studying agriculture—more than double the percentage of other regions.

Table 3.2 provides a historical view of the same relationships shown in **Table 3.1**. In general, this table indicates a consistent pattern in the field of study choices in each world region. For example, this table indicates that students from the Middle East have consistently (and increasingly) chosen engineering as their field of study since 1949/50 at a higher rate than other foreign students in the United States.

Table 3.3 describes the same relationship as **Table 3.2** for the leading countries within each region. This table indicates that significant differences exist between countries in each region. The most dramatic example of this exists between Nigeria and Libya with the two major fields—engineering and business/management—chosen by substantially dif-

3A Field of Study by World Region (Percentages): 1979/80*



*Ranked by leading fields within each region. For details see Table 3.1 on following page.

ferent proportions of Nigerians and Libyans. Another substantial difference exists in the proportion of Venezuelans choosing engineering compared to students from Mexico. As in **Table 3.2**, historical data in this table suggest relative continuity over the past thirty years.

Table 3.4 provides an alternative view of the relationship between world region and field of study by indicating the percentage of foreign students within each field of study from each region. While this table reflects the overall distribution of foreign students by region, it also highlights the impact of particular groups of foreign students on specific fields of study in the United States.

This table indicates some dramatic differences in the distribution of foreign students within field of study. Most striking is the fact that almost one-half of all engineering students reported are from the Middle East with nearly one-fourth more from Asia. These two regions also account for almost seventy-five percent of all foreign students studying mathematics and computer science.

Table 3.4 also confirms the previously noted dominance of the field of agriculture by Africans and Latin Americans. Also notable is the fact that 35.5% of all business/management students and 36.5% of all natural and life sciences students reported were from Asia. A very high proportion of intensive English language students (42.6%) were from Latin America.

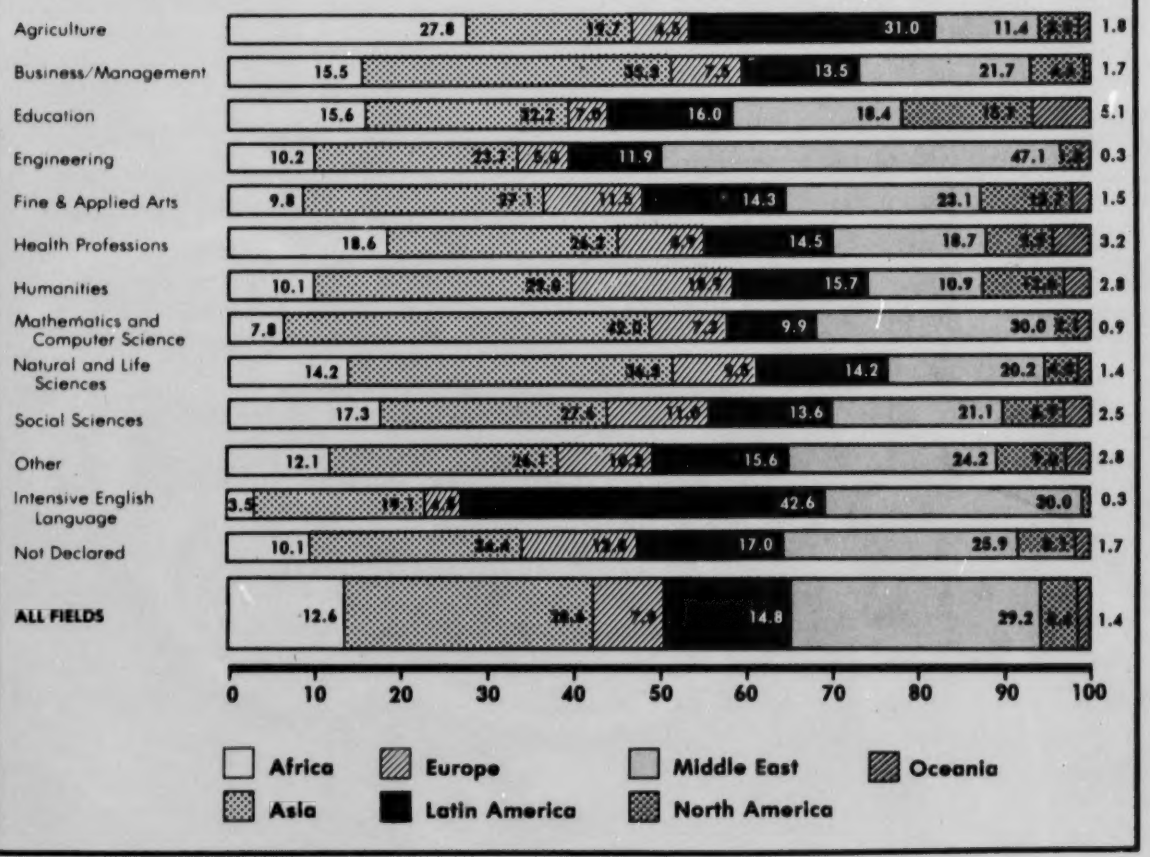
3C World Region by Field of Study (Percentages): 1979/80



4. ACADEMIC LEVEL

Forty-five percent of all foreign students in the survey were reported enrolled in bachelor's degree programs while an additional 35.9% were graduate students. Associate degree programs enrolled an additional 13% of all students reported and 6% were reported in intensive English language, practical training, or non-degree programs.

The academic level of foreign students by world region is summarized in **Table 4.1**. This table indicates significant differences in the proportions of students from each region at the associate, bachelor's, and graduate levels of instruction.

One region, Asia, showed a substantially higher proportion of graduate students (53.3%) than any other. Asia was the only region with more graduate students than undergraduates. By contrast, the Middle East had less then one-quarter of its students enrolled at the graduate level. Europeans were almost evenly divided between undergraduates and graduates while North Americans (primarily Canadians) had more than twice as many undergraduates as graduate students. The Middle East and Latin America had the largest proportions of students enrolled for associate degrees (21.3% and 17.4% respectively).

Table 4.2 further subdivides the major academic levels described in **Table 4.1** for each world region. This table indicates relatively few major differences in the distribution among levels between world regions. Among undergraduates, the distribution of students from Oceania (primarily Australia) indicates a significantly greater percentage of freshmen than any other region.

On the graduate level, **Table 4.2** indicates that master's students represent a lower percentage of all graduate students from Europe, North America, and Oceania than those from the four other world regions. The same three regions also have higher

4.1 Grouped Academic Level by World Region (Percentages): 1979/80

World Region	Academic Level				
	Associate	Bachelor's	Graduate	Other	All Academic Levels

4.2 Percentage Distribution of Foreign Students by Academic Level and World Region:

World Region	Associate	Bachelor's					Bachelor's Percentage Distribution of All Students
		Freshman	Sophomore	Junior	Senior	Unspecified	
Africa	11.7	23.8	18.7	20.0	22.9	14.6	**49.5**
Asia (South and East)	6.1	23.7	15.4	17.2	20.6	23.1	**35.8**
Europe	6.5	27.4	17.7	14.8	14.9	25.2	**41.6**
Latin America	17.4	26.5	18.8	18.9	20.8	15.0	**46.4**
Middle East	21.3	25.5	19.4	19.2	14.7	21.2	**49.8**
North America	8.8	29.2	22.8	20.3	16.6	11.1	**59.1**
Oceania	15.9	40.7	18.9	17.2	12.0	11.2	**47.6**
ALL REGIONS	**13.0**	**25.7**	**18.4**	**18.5**	**18.3**	**19.1**	**45.1**

reported percentages of students in professional training.

Table 4.3 provides a historical perspective on the data provided in **Table 4.1.** This table indicates an increase in the proportion of foreign students at the undergraduate level and a decrease in the percentage at the graduate level since 1959/60. However, the undergraduate/graduate proportions for students from all regions in 1979/80 were remarkably close to the corresponding numbers twenty-five years earlier.

Some regions showed more dramatic changes over the same twenty-five years. Africa, which from 1954/55 to 1969/70 sent almost equal numbers of undergraduate and graduate students, showed a significant increase in the percentage of undergraduates over the past ten years. An even greater change in the percentage of undergraduates occurred among students reported from Oceania over the past twenty-five years—from 35.9% in 1954/55 to 63.5% in 1979/80.

Table 4.3 also indicates that the high proportion of graduate students from Asia noted in **Table 4.1** has been reported consistently over the past twenty-five years.

The only region to show a decrease in the percentage of its students at the undergraduate level is Latin America. **Table 4.3** shows that it declined from 71.0% in 1959/60 to 63.8% in 1979/80.

Table 4.4 provides the distribution by academic level of students from leading countries within each region. As has been noted before, substantial differences may exist between countries within the same region. Such differences are most notable for the two leading countries of Asia—Taiwan and Japan. While in 1954/55 these two countries sent similar proportions of undergraduate and graduate students, the proportions began to shift significantly in 1969/70 and were dramatically different in 1979/80. Only 14.7% of students from Taiwan were undergraduates as compared to 54.6% of Japanese students. This difference, it should be noted, is a reflection of the extraordinarily high percentage of graduate students from Taiwan, 82.6%, which is more than double the percentage for all foreign students, 35.9%.

Among the leading countries in **Table 4.4**, several others differed significantly from the academic level distribution for all foreign students. Those with higher percentages of undergraduates and lower percentages of graduates are Nigeria, Venezuela, Iran, Saudi Arabia, and Canada. Besides Taiwan, Australia also sent a substantially higher percentage of graduate than undergraduate students.

Table 4.4 indicates that the major differences noted in the proportions of undergraduates and graduates in 1979/80 have, with the exception of Nigeria, been true in all the surveys over the past twenty-five years.

5. SEX DISTRIBUTION

The distribution of foreign students by sex within each world region for 1979/80 is described in **Table 5.1.** This table shows an overall ratio of men to women among foreign students of 73.4% to 26.6%. Two regions, Africa and the Middle East, have significantly higher percentages of male students in the United States: 82.5% and 83.8% respectively.

Table 5.2 provides historical data on the same patterns as **Table 5.1.** It indicates that Africa and the Middle East have historically sent very high proportions of men—as high as 89% from the Middle East in 1952/53.

The gradual increase in the proportion of female foreign students since 1959/60 from 21.7% to 26.6% is, in part, a reflection of significant increases in the proportion of women studying in the United States from Latin America, North America, and Oceania.

Table 5.3 provides 1979/80 data and **Table 5.4** provides a historical breakdown of data on the sex distribution of foreign students from leading countries within world regions. **Table 5.4** details the historically low percentages of women among foreign students from such leading countries as Nigeria, Iran, Saudi Arabia, and Libya. Thus, while some substantial percentage increases have been reported for women from these countries, they still represent a much lower percentage of their countries' student populations in the United States.

Several leading countries have doubled the percentage of women among their student populations in the United States since 1959/60. Among these are Venezuela, Mexico, Canada, and Australia.

The leading countries from Asia and Europe have had relatively high and continuously increasing percentages of women among their foreign students in the United States. Of the leading countries in **Table 5.4**, the Federal Republic of Germany in 1979/80 had the highest percentage of women reported, 41.0%.

Table 5.5 shows the distribution of foreign students by sex within each field of study grouping. This table indicates some substantial differences in the sex distribution within different fields.

The most striking difference which **Table 5.5** demonstrates is the dominance of men among foreign students studying engineering: 94.6% of all engineering students are men. The other major fields of study—business and management, social science, and natural and life sciences—all have a distribution close to that for all foreign students (approximately three men to every woman reported).

Women made up a substantially larger proportion (over 40%) of several other fields of study: education (46.5%), health professions (43.0%), humanities (41.9%), and fine arts (41.6%). A relatively high percentage of women were also reported among students in other fields of study (41.4%) and among those foreign students who had not yet declared a field of study (38.9%).

Table 5.6 further subdivides the data in **Table 5.5** with regional data. This table shows that the extremely high proportion of men studying engineering reported in **Table 5.5** is true for all world regions, ranging from a "low" of 91.2% for male students from Latin America to a high of 97.7% for all engineering students from Africa.

The sex distribution among foreign students from different world regions is far less uniform in other fields of study. Among business and management students, the proportions ranged from 60.4% men among students from Oceania to 82.2% men among African and Middle Eastern students. In the social

5.1 Sex Distribution by World Region (Percentages): 1979/80

World Region	Male	Female
Africa	82.5	17.5
Asia (South and East)	69.0	31.0
Europe	65.5	34.5
Latin America	65.4	34.6
Middle East	83.8	16.2
North America	61.3	38.7
Oceania	65.7	34.3
ALL REGIONS	**73.4**	**26.6**

sciences, the range was slightly greater, 56.1% men among North Americans to 81.4% among Africans.

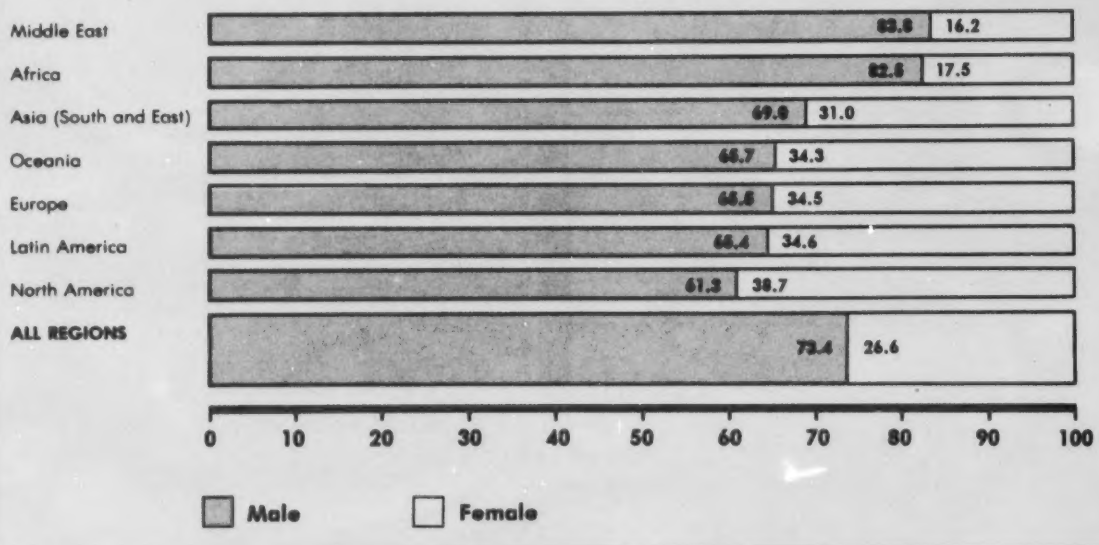
Women form the majority of foreign students of education from Asia and Latin America, of the health professions from Asia and North America, and of the humanities from Europe. (They comprise almost exactly half of all education students from Europe and North America as well.)

Table 5.7 shows the distribution of foreign students by sex among academic levels. This table indicates several factors in the sexual distribution of foreign students.

First, there is a higher proportion of women among bachelor's degree candidates (27.8%) than among graduate students (22.2%). Second, among bachelor's degree students, there is a higher proportion of women among lower classes than upperclasses, ranging from 29.3% of freshmen to 25.8% of seniors. Third, there is a higher proportion of men at the doctorate level than at the master's level. Finally, there are relatively higher proportions of women reported in non-degree and intensive English programs than in any other academic level.

Table 5.8 describes the sexual distribution of foreign students by aggregate academic level for each world region. This table indicates that, while women constitute 27.8% of all undergraduate and 22.2% of all graduate foreign students, in some regions the proportions are quite different. Among graduate students, the proportion of women ranges from 13.0% of Africans to 30.4% of North Americans. Among undergraduates, the percentage of women ranges from 15.7% among students from the Middle East to 41.3% among North Americans. More than half of all students from North America reported under "other" academic levels (practical training, non-degree, and intensive English) were women.

5A Sex Distribution by World Region (Percentages): 1979/80*



*Ranked by percentage of men in each region.

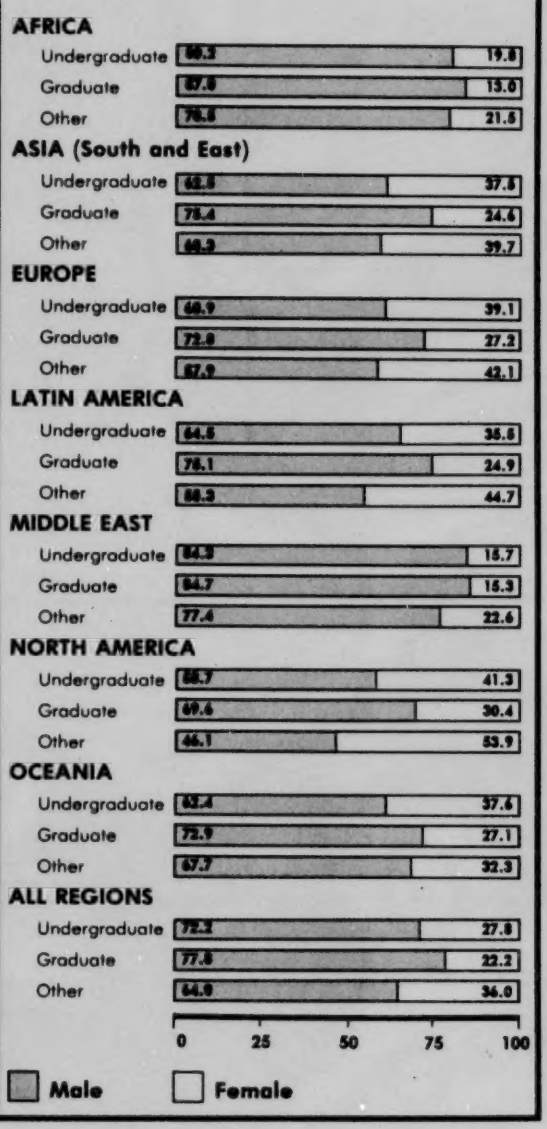
5E Sex Distribution by World Region/Academic Level (Percentages): 1979/80



6. AGE

The percentage distribution of foreign students in each of six age groups by world region is provided in **Table 6.1**. This table shows that over forty percent of all foreign students in the United States are twenty-two years of age or younger and nearly two-thirds are twenty-five years old or less.

Table 6.1 also shows that some significant differences in these percentages exist among the world regions. Africa, for example, has a considerably older student population in the United States than any other region with more than one-half its students older than twenty-six years of age. Almost one-third of all Africans reported were between twenty-six and thirty years old and over twenty percent were over thirty years old. These figures are even more significant when considered in relation to the fact that 61.2% of all Africans were reported as undergraduates (see **Table 4.3**).

By contrast, North America—principally Canada—has the youngest student population in the United States with more than three-quarters of all students reported under twenty-six years old and 61.1% less than twenty-three years of age.

Foreign students from Asia were reported in higher age brackets than students from other regions—an observation that appears consistent with the relatively high percentage of these students reported at the graduate level (see **Table 4.3**).

Approximately seventy percent of students from all other regions were reported to be twenty-five years of age or less.

Table 6.2 provides data reported in an IIE survey of foreign students in 1954/55 with comparable data for 1979/80. This table shows that, of the four age groups identified in 1954/55, the group of students over thirty years of age and the group of students between twenty-six and thirty years of age both dropped by approximately four percent over the twenty-five-year period. This corresponded to an increase in the twenty-to-twenty-five-year age group by nearly eight percent.

The observation that African and Asian students tended to be older than their peers from other regions appears to have been even more pronounced in 1954/55. However, students from the Middle East and Oceania were also reported with far higher percentages in the higher age brackets.

Table 6.3 provides the percentage distributions of foreign students by age group from leading countries within each region. As in other tables comparing leading countries, significant variations often exist between countries in each region.

Most prominent among these differences in **Table 6.3** are those between Taiwan and Japan in Asia—with Taiwan reported with two-thirds of its students above twenty-five years of age and less than eight percent of its students under twenty-three years of age.

Other differences within regions include the low percentage of Saudi Arabians under twenty years of age (4.6%) when compared with Iran (20.5%) and the average for the Middle East (17.9%). Australia has a substantially older student population than the average for countries in Oceania (see **Table 6.1**).

Table 6.4 details the age distribution for leading countries within each region for 1954/55 and 1979/80. This table indicates several shifts in the age distribution among leading countries.

Nigeria, while having a substantially older population studying in the United States in 1979/80 (see **Table 6.3**) has, nevertheless, a far younger student group than it did twenty-five years ago. In 1954/55, 78.6% of all Nigerian students were over twenty-five years old. In 1979/80, this number was 51.2%, substantially lower than the earlier figure while remaining much higher than the 35.4% figure for all foreign students.

Table 6.4 generally confirms the trend observed in **Table 6.2** that the foreign student population had become younger over the twenty-five-year period covered. However, several countries (Libya, Taiwan, Saudi Arabia, and Venezuela) did not follow that trend.

7. FIELD OF STUDY/ACADEMIC LEVEL RELATIONSHIPS

The breakdown of each field of study choice by academic level for 1979/80 is shown in **Table 7.1.** This table shows that while the distribution of foreign students by academic level is 58.1% undergraduate and 36.2% graduate, that distribution varies significantly for students in different fields of study.

Most significant of the differences is the relatively high percentage of undergraduates (69.7%) in the field of study with the most students, engineering. Among the major fields, only fine arts has as high a percentage of undergraduates. Sixty-four percent of all students in business and management, the second largest field of study, are undergraduates.

Five major fields of study groupings have a majority of their students at the graduate level. They are agriculture, education, the humanities, natural and life sciences, and the social sciences.

Table 7.2 provides historical data comparable to data in **Table 7.1** from surveys beginning in 1963/64. It should be noted that this table groups fields of study into eight categories, reflecting different classifications in the earlier surveys. 1979/80 data has been re-grouped to be comparable to the historical data.

Table 7.2 shows, as did tables in section 4, the increasing percentage of foreign students in undergraduate programs of study—in particular since 1973/74. This change has been most apparent in engineering, where undergraduates now comprise 69.6% compared to 51.2% in 1973/74. The humanities, natural and life sciences, and agriculture have also been reported with significant increases in their undergraduate proportions in recent years.

Business and management, education, and the social sciences have had roughly the same percentages of undergraduates over the past sixteen years.

Table 7.3 further subdivides data on field of study and academic level by world region, and demonstrates that significant differences exist between the regions in the field of study/academic level relationships.

Among the largest fields of study, several significant variations from the figures for all regions are worth noting. In engineering, for example, while 69.6% of all foreign students in this field were undergraduates, 61.6% of all Asian engineering students were reported at the graduate level. By contrast, 85.7% of all engineering students from the Middle East were reported at the undergraduate level. Seventy-nine percent of all North Americans (principally Canadians) studied engineering at the undergraduate level.

More than two-thirds of all foreign students studied business and management at the undergraduate level with the exception of those from Asia (54.9%) and Europe (51.1%). More than three-fourths of all North Americans studied in this field at the undergraduate level as did 86.3% of students from Oceania.

Social sciences were studied at the graduate level by a significantly higher percentage of Asian students than students from any other region. Substantially lower percentages of North Americans and students from Oceania studied this field at the graduate level.

Almost three-quarters of Asian students of the natural and life sciences were studying at the graduate level compared with 54.1% of all students. By contrast, 36.7% of all Middle Eastern students in this field were graduate students.

A very high proportion of all Asian students studying agriculture (80.0%) were at the graduate level—more than double the percentage from North America (31.8%) and nearly double the percentage from Oceania (42.7%), Africa (44.3%), and Latin America (44.3%).

An alternative view of the relationship between field of study and academic level is provided in **Tables 7.4** and **7.5.** These tables show the proportion of all foreign students studying in each field at each academic level. **Table 7.4** again indicates the

7.1 Academic Level by Field of Study: (Percentages within Each Field of Study): 1979/80

Field of Study	Academic Level			All Levels
	Undergrad	Graduate	Other	
Agriculture	44.5	53.1	2.4	100.0
Business & Management	64.2	33.6	2.2	100.0

ALL FIELDS OF STUDY	**58.1**	**36.2**	**5.7**	**100.0**

substantially higher percentage of engineering students at the undergraduate level than the graduate level and shows that nearly one in five is an undergraduate student of engineering or engineering technologies. This table also indicates that after engineering and business, the largest groups of field of study/academic level clusters are the graduate students in the social sciences and natural and life sciences.

Table 7.5 provides historical data on the proportion of students by field and academic level from surveys beginning in 1963/64. This table indicates relatively few shifts in the patterns observed in **Table 7.4** over the previous sixteen years. An exception to this apparent continuity occurs in engineering, which, while chosen by roughly the same percentage of students over the sixteen-year period, has become the choice of an increasing percentage of students at the undergraduate level.

Table 7.6 shows for each academic level the

7.2 Academic Level by Field of Study (Percentages): Selected Years, 1963/64—1979/80

**Field of study categories in this table are those in 1963—1974. Humanities includes architecture, fine arts, and liberal arts; physical and natural sciences includes mathematics; social sciences includes home economics and law. 1979/80 survey data have been adjusted to be compatible with these categories.*

percentage of foreign students in each field of study. As was indicated in previous tables, this table shows a significantly different distribution of foreign students by field at the undergraduate and graduate levels.

Nearly fifty percent of all undergraduate foreign students are studying engineering and business and management (29.6% and 17.9% respectively) with comparatively small percentages distributed fairly evenly among the other fields. Among graduate students, engineering (19.9%) and business and management (14.9%) are also the largest choices, but are closely followed by the social sciences (13.3%) and natural and life sciences (12.7%). The proportion of foreign students studying agriculture, education, the humanities, natural and life sciences, and the social sciences at the graduate level is double the undergraduate proportion.

Total columns legend: N-No reply. L-Last year's total. F-First time polled. M-Merged. C-Closed. E-Estimate.
Response legend (last column): S1: Step 1. S2: Step 2. S3: Step 3. Y-Response received. N-Response not received.

APPENDIX 4:
Field of Study Taxonomy

SECTION I:
CONVENTIONAL ACADEMIC SUBDIVISIONS OF KNOWLEDGE AND TRAINING

0100 AGRICULTURE and NATURAL RESOURCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the production of food and management of natural fiber, plant, forest, and wildlife resources.

0101 Agriculture, general
0102 Agronomy (field crops and crop management)
0103 Soils science (management and conservation)
0104 Animal science (husbandry)
0105 Dairy science (husbandry)
0106 Poultry science
0107 Fish, game, and wildlife management
0108 Horticulture (fruit and vegetable production)
0109 Ornamental horticulture (floriculture, nursery science)
0110 Agricultural and farm management
0111 Agricultural economics
0112 Agricultural business
0113 Food science and technology
0114 Forestry
0115 Natural resources management
0116 Agriculture and forestry technologies (baccalaureate and higher programs)
0117 Range management
0120 Agricultural education
0122 Pre-agriculture
0125 Watershed management
0199 Other, specify

0200 ARCHITECTURE and ENVIRONMENTAL DESIGN

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with training for a profession in designing buildings, communities, parks, and other man-made aspects of the physiosocial environment.

0201 Environmental design, general
0202 Architecture
0203 Interior design
0204 Landscape architecture
0205 Urban architecture
0206 City, community, and regional planning
0210 Pre-architecture
0299 Other, specify

0300 AREA STUDIES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with programs designed to study cultures indigenous to specific geographic regions.

0301 Asian studies, general
0302 East Asian studies
0303 South Asian (India, etc.) studies
0304 Southeast Asian studies
0305 African studies
0306 Islamic studies
0307 Russian and Slavic studies
0308 Latin American studies
0309 Middle Eastern studies
0310 European studies, general
0311 Eastern European studies
0312 West European studies
0313 American studies
0314 Pacific area studies
0399 Other, specify

0400 BIOLOGICAL SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the science of life or living matter in all its forms and phenomena especially with regard to the origin, growth, reproduction, and structure of life forms.

0401 Biology, general
0402 Botany, general
0403 Bacteriology
0404 Plant pathology
0405 Plant pharmacology
0406 Plant physiology
0407 Zoology, general
0408 Pathology, human and animal
0409 Pharmacology, human and animal
0410 Physiology, human and animal
0411 Microbiology
0412 Anatomy
0413 Histology
0414 Biochemistry
0415 Biophysics
0416 Molecular biology
0417 Cell biology (cytology, cell physiology)
0418 Marine biology
0419 Biometrics and biostatistics
0420 Ecology
0421 Entomology
0422 Genetics
0423 Radiobiology
0424 Nutrition, scientific (excludes nutrition in home economics and dietetics)
0425 Neurosciences
0426 Toxicology
0427 Embryology
0431 Developmental biology
0432 Virology
0450 Immunobiology
0460 Basic medical sciences
0461 Parasitology
0462 Psychobiology
0499 Other, specify

0500 BUSINESS and MANAGEMENT

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., related to the organization, operation, administration, and control of private and public organizations.

0501 Business and commerce, general
0502 Accounting
0503 Business statistics
0504 Banking and finance
0505 Investments and securities
0506 Business management and administration
0507 Operations research
0508 Hotel and restaurant management
0509 Marketing and purchasing
0510 Transportation and public utilities
0511 Real estate
0512 Insurance
0513 International business
0514 Secretarial studies (baccalaureate and higher programs)
0515 Personnel management
0516 Labor and industrial relations
0517 Business economics
0520 Pre-business
0525 Management information systems
0566 Taxation
0599 Other, specify

0600 COMMUNICATIONS

Specify field designations which characterize students, faculty, facilities, degree programs, research projects, etc., related to collection, preparation, and presentation of ideas and information intended for popular consumption through mass media.

0601 Communications, general
0602 Journalism (printed media)
0603 Radio/television
0604 Advertising
0605 Communication media (use of videotape, films, etc., oriented specifically toward radio/television)
0610 Public relations
0699 Other, specify

0700 COMPUTER and INFORMATION SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, course work, research projects, etc., having to do with the design, development, and application of computer capabilities to data storage and manipulation and related computational procedures.

0701 Computer and information sciences, general
0702 Information sciences and systems
0703 Data processing
0704 Computer programming
0705 Systems analysis
0799 Other, specify

0800 EDUCATION

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., related to administration and control of educational organizations and institutions and subjects related to instruction and services both within and outside of such formal organizations.

0801 Education, general
0802 Elementary education, general
0803 Secondary education, general
0804 Junior high school education
0805 Higher education, general
0806 Junior and community college education
0807 Adult and continuing education
0808 Special education, general
0809 Administration of special education
0810 Education of the mentally retarded
0811 Education of the gifted
0812 Education of the deaf
0813 Education of the culturally disadvantaged
0814 Education of the visually handicapped
0815 Speech correction
0816 Education of the emotionally disturbed
0817 Remedial education
0818 Special learning disabilities
0819 Education of the physically handicapped
0820 Education of the multiple handicapped
0821 Social foundations (history and philosophy of education)
0822 Educational psychology (include learning theory)
0823 Pre-elementary education (kindergarten)
0824 Educational statistics and research
0825 Educational testing, evaluation and measurement
0826 Student personnel (counseling and guidance)
0827 Educational administration
0828 Educational supervision
0829 Curriculum and instruction
0830 Reading education (methodology and theory)
0831 Art education (methodology and theory)
0832 Music education (methodology and theory)
0833 Mathematics education (methodology and theory)
0834 Science education (methodology and theory)
0835 Physical education
0836 Driver and safety education
0837 Health education (include family life education)
0838 Business, commerce, and distributive education
0839 Industrial arts, vocational, and technical education
0845 English language and literature education
0848 Foreign language and literature education
0850 Bilingual education
0851 International education
0852 Computing in education
0861 Home economics education
0871 Nursing education
0872 Social studies education
0873 Urban education
0899 Other, specify

0900 ENGINEERING

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the practical application of basic scientific knowledge to the design, production, and operation of systems intended to facilitate man's control and use of his natural environment.

0901 Engineering, general
0902 Aerospace, aeronautical, and astronautical engineering
0903 Agricultural engineering
0904 Architectural engineering
0905 Bioengineering and biomedical engineering
0906 Chemical engineering (include petroleum refining)
0907 Petroleum engineering (exclude petroleum refining)
0908 Civil, construction, and transportation engineering
0909 Electrical, electronics, and communications engineering
0910 Mechanical engineering
0911 Geological engineering
0912 Geophysical engineering
0913 Industrial and management engineering
0914 Metallurgical engineering
0915 Materials engineering
0916 Ceramic engineering
0917 Textile engineering
0918 Mining and mineral engineering
0919 Engineering physics
0920 Nuclear engineering
0921 Engineering mechanics
0922 Environmental and sanitary engineering
0923 Naval architecture and marine engineering
0924 Ocean engineering
0925 Engineering technologies (baccalaureate and higher programs)
0926 Computer engineering
0927 Fuels engineering
0928 Engineering mathematics
0930 Pre-engineering
0935 Systems engineering
0940 Energy engineering
0999 Other, specify

1000 FINE and APPLIED ARTS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the creation and appreciation of the diverse modes of communicating ideas and emotions by means of stylized, visual, and non-visual representations and symbols.

1001 Fine arts, general
1002 Art (painting, drawing, sculpture)
1003 Art history and appreciation
1004 Music (performing, composition, theory)
1005 Music (liberal arts program)
1006 Music history and appreciation (musicology)
1007 Dramatic arts
1008 Dance
1009 Applied design (ceramics, weaving, textile design, fashion design, jewelry, metalsmithing, interior decoration, commercial art)
1010 Cinematography
1011 Photography
1099 Other, specify

1100 FOREIGN LANGUAGES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., related to mastery of a language other than English or related to the study of a foreign culture through exploration of the literature of that culture as expressed in the vernacular languages.

1101 Foreign languages, general (includes concentration on more than one foreign language without major emphasis on one language)
1102 French
1103 German
1104 Italian
1105 Spanish
1106 Russian
1107 Chinese
1108 Japanese
1109 Latin
1110 Greek, classical
1111 Hebrew
1112 Arabic
1113 Indian (Asiatic)
1114 Scandinavian languages
1115 Slavic languages (other than Russian)
1116 African languages (non-Semitic)
1130 Armenian
1131 Bengali
1132 Dutch
1133 Hausa
1134 Hindi
1135 Korean
1136 Persian
1137 Polish
1138 Portuguese
1140 Sanskrit
1141 Tagalog
1142 Thai
1143 Yiddish
1150 Romance languages and literature, general
1199 Other, specify

CONVENTIONAL ACADEMIC SUBDIVISIONS

1200 HEALTH PROFESSIONS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the maintenance and restoration of physical and mental health.

1201 Health professions, general
1202 Hospital and health care administration
1203 Nursing (baccalaureate and higher programs)
1204 Dentistry, D.D.S. or D.M.D. degree
1205 Dental specialties (work beyond first-professional degree, D.D.S. or D.M.D.)
1206 Medicine, M.D. degree
1207 Medical specialties (work beyond first-professional degree, M.D.)
1208 Occupational therapy
1209 Optometry
1210 Osteopathic medicine, D.O. degree
1211 Pharmacy
1212 Physical therapy
1213 Dental hygiene (baccalaureate and higher program)
1214 Public health
1215 Medical record librarianship
1216 Podiatry (Pod.D. or D.P.) or podiatric medicine (D.P.M.)
1217 Biomedical communication
1218 Veterinary medicine (D.V.M. degree)
1219 Veterinary medicine specialties (work beyond first-professional degree, D.V.M.)
1220 Speech pathology and audiology
1221 Chiropractic
1222 Clinical social work (medical and psychiatric and specialized rehabilitation services)
1223 Medical laboratory technologies (baccalaureate and higher programs)
1224 Dental technologies (baccalaureate and higher programs)
1225 Radiologic technologies (baccalaureate and higher programs)
1280 Pre-dentistry
1281 Pre-medicine
1282 Pre-nursing
1283 Pre-pharmacy
1284 Pre-veterinary medicine
1299 Other, specify

1300 HOME ECONOMICS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the theory and practice of family and home care including the science of foods, home decoration and management, and child care.

1301 Home economics, general
1302 Home decoration and home equipment
1303 Clothing and textiles
1304 Consumer economics and home management
1305 Family relations and child development
1306 Foods and nutrition (include dietetics)
1307 Institutional management and cafeteria management
1399 Other, specify

1400 LAW

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with instruction in the legal customs, practices, and rules of society and states for the purpose of pursuing a career in jurisprudence.

1401 Law, general
1450 Pre-law
1460 Comparative jurisprudence
1462 Corporation law
1463 Criminal justice law
1465 Labor law
1468 International law
1499 Other, specify

1500 LETTERS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with English language and literature and value systems related to ancient and modern cultures.

1501 English, general
1502 Literature, English
1503 Comparative literature
1504 Classics
1505 Linguistics (include phonetics, semantics, and philology)
1506 Speech, debate, and forensic science (rhetoric and public address)
1507 Creative writing
1508 Teaching of English as a foreign language
1509 Philosophy
1510 Religious studies (exclude theological professions)
1511 Humanities
1599 Other, specify

1600 LIBRARY SCIENCE

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc,. having to do with instruction in the professional skills required to organize collections of books and related materials and the training necessary for providing services related to them.

1601 Library science, general
1699 Other, specify

1700 MATHEMATICS

Subject field of designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the science of numbers and space configurations and their operations, measurement, relationships, and abstractions.

1701 Mathematics, general
1702 Statistics, mathematical and theoretical
1703 Applied mathematics
1710 Applied statistics
1799 Other, specify

1800 MILITARY SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with techniques and skills unique to the pursuit of a professional career as a military officer.

1801 Military science (Army)
1802 Naval science (Navy, Marines)
1803 Aerospace science (Air Force)
1804 Military sciences, general
1899 Other, specify

1900 PHYSICAL SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with the basic nature of matter, energy, and associated phenomena.

1901 Physical sciences, general
1902 Physics, general (exclude biophysics)
1903 Molecular physics
1904 Nuclear physics
1905 Chemistry, general (exclude biochemistry)
1906 Inorganic chemistry
1907 Organic chemistry
1908 Physical chemistry
1909 Analytical chemistry
1910 Pharmaceutical chemistry
1911 Astronomy
1912 Astrophysics
1913 Atmospheric sciences and meteorology
1914 Geology
1915 Geochemistry
1916 Geophysics and seismology
1917 Earth sciences, general
1918 Paleontology
1919 Oceanography
1920 Metallurgy
1921 Particle physics
1935 Optics
1939 Hydraulics
1940 Hydrology
1954 Atomic physics
1955 Quantum mechanics
1958 Applied mechanics
1959 Applied physics
1960 Applied science
1961 Energetics
1962 Fluid dynamics and mechanics
1979 Solid state physics
1999 Other, specify

2000 PSYCHOLOGY

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with behavioral and mental processes.

2001 Psychology, general
2002 Experimental psychology (animal and human)
2003 Clinical psychology
2004 Phychology for counseling
2005 Social psychology
2006 Psychometrics
2007 Statistics in psychology
2008 Industrial psychology
2009 Developmental psychology
2010 Physiological psychology
2020 Psycholinguistics
2099 Other, specify

2100 PUBLIC AFFAIRS and SERVICES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., related to developing and improving competencies in the management and operation of governmental agencies.

2101 Community service, general
2102 Public administration
2103 Parks and recreation management
2104 Social work and helping services (other than clinical social work)
2105 Law enforcement and corrections (baccalaureate and higher programs)
2106 International public service (other than diplomatic service)
2107 Criminal justice
2199 Other, specify

2200 SOCIAL SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., having to do with all aspects of the past and present activities, conduct, interactions, and organizations of humans.

2201 Social sciences, general
2202 Anthropology
2203 Archaeology
2204 Economics
2205 History
2206 Geography
2207 Political science and government
2208 Sociology
2209 Criminology
2210 International relations
2211 Afro-American (black culture) studies
2212 American Indian cultural studies
2213 Mexican-American cultural studies
2214 Urban studies
2215 Demography
2219 Hispanic-American cultural studies
2299 Other, specify

2300 THEOLOGY

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., related to preparation and training for a religious vocation.

2301 Theological professions, general
2302 Religious music
2303 Biblical languages
2304 Religious education
2310 Missions
2311 Pre-ministry
2312 Jewish studies/Judaism
2399 Other, specify

4900 INTERDISCIPLINARY STUDIES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc., involving more than one major discipline without primary concentration in any one area.

4901 General liberal arts and sciences
4902 Biological and physical sciences
4903 Humanities and social sciences
4904 Engineering and other disciplines
4999 Other, specify

Section II:
TECHNOLOGICAL AND OCCUPATIONAL CURRICULUMS LEADING TO ASSOCIATE DEGREES AND OTHER AWARDS BELOW THE BACCALAUREATE

5000 BUSINESS and COMMERCE TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc., specifically associated with development of skills required for commercial, business, or secretarial occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5001 Business and commerce technologies, general
5002 Accounting technologies
5003 Banking and finance technologies
5004 Marketing, distribution, purchasing, business, and industrial management technologies
5005 Secretarial technologies (include office machines training)
5006 Personal service technologies (stewardess, cosmetologist, etc.)
5007 Photography technologies
5008 Communications and broadcasting technologies (radio/television, newspapers)
5009 Printing and lithography technologies
5010 Hotel and restaurant management technologies
5011 Transportation and public utility technologies
5012 Applied arts, graphic arts, and fine arts technologies (include advertising design)
5099 Other, specify

5100 DATA PROCESSING TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc., specifically associated with development of skills required for data processing or related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5101 Data processing technologies, general
5102 Key punch operator and other input preparation technologies
5103 Computer programmer technologies
5104 Computer operator and peripheral equipment operation technologies
5105 Data processing equipment maintenance technologies
5199 Other, specify

5200 HEALTH SERVICES and PARAMEDICAL TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc., specifically associated with development of skills required for health service related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5201 Health services assistant technologies, general
5202 Dental assistant technologies
5203 Dental hygiene technologies
5204 Dental laboratory technologies
5205 Medical or biological laboratory assistant technologies
5206 Animal laboratory assistant technologies
5207 Radiologic technologies (X-ray, etc.)
5208 Nursing, R.N. (less than 4-year program
5209 Nursing, practical (L.P.N. or L.V.N.—less than 4-year program)
5210 Occupational therapy technologies
5211 Surgical technologies
5212 Optical technologies (include ocular care, ophthalmic, optometric technologies)
5213 Medical record technologies
5214 Medical assistant and medical office assistant technologies
5215 Inhalation therapy technologies
5216 Psychiatric technologies (include mental health aide programs)
5217 Electro diagnostic technologies (include E.K.G., E.E.G., etc.)
5218 Institutional management technologies (rest home, etc.)
5219 Physical therapy technologies
5299 Other, specify

5300 MECHANICAL and ENGINEERING TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc., specifically associated with development of skills required for mechanical and engineering related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5301 Mechanical and engineering technologies, general
5302 Aeronautical and aviation technologies
5303 Engineering graphics (tool and machine drafting and design)
5304 Architectural drafting technologies
5305 Chemical technologies (include plastics)
5306 Automotive technologies
5307 Diesel technologies
5308 Welding technologies
5309 Civil technologies (surveying, photogrammetry, etc.)
5310 Electronics and machine technologies (television, appliance, office machine repair, etc.)
5311 Electromechanical technologies
5312 Industrial technologies
5313 Textile technologies
5314 Instrumentation technologies
5315 Mechanical technologies
5316 Nuclear technologies
5317 Construction and building technologies (carpentry, electrical work, plumbing, sheet metal, air conditioning, heating, etc.)
5399 Other, specify

5400 NATURAL SCIENCE TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc., specifically associated with development of skills required for natural science related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5401 Natural science technologies, general
5402 Agriculture technologies (include horticulture)
5403 Forestry and wildlife technologies (include fisheries)
5404 Food services technologies
5405 Home economics technologies
5406 Marine and oceanographic technologies
5407 Laboratory technologies, general
5408 Sanitation and public health inspection technologies (environmental health technologies)
5499 Other, specify

5500 PUBLIC SERVICE RELATED TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc., specifically associated with development of skills required for public service related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5501 Public service technologies, general
5502 Bible study or religion-related occupations
5503 Education technologies (teacher aide and 2-year teacher training programs)
5504 Library assistant technologies
5505 Police, law enforcement, corrections technologies
5506 Recreation and social work related technologies
5507 Fire control technology
5508 Public administration and management technologies
5599 Other, specify

6000 INTENSIVE ENGLISH LANGUAGE

7000 PRE-PROFESSIONAL

9000 UNDECLARED

APPENDIX 5:

Taxonomy of Countries by Continent and Sub-Region

1000	AFRICA
1100	**Eastern Africa**
1115	Burundi
1120	Comoros
1105	Djibouti, Republic of
1125	Ethiopia
1130	Kenya
1135	Madagascar
1140	Malawi
1145	Mauritius
1150	Mozambique
1155	Réunion
1165	Rwanda
1170	Seychelles
1175	Somalia
1180	Tanzania
1185	Uganda
1190	Zambia
1160	Zimbabwe
1200	**Central Africa**
1210	Angola
1220	Cameroon
1230	Central African Empire
1240	Chad
1250	Congo, People's Republic of the
1260	Equatorial Guinea
1270	Gabon
1280	Sao Tomé & Principe
1290	Zaire
1300	**North Africa**
1310	Algeria
1320	Canary Islands
1330	Egypt
1340	Libya
1350	Morocco
1370	Sudan
1380	Tunisia
1360	Western Sahara
1400	**Southern Africa**
1410	Botswana
1420	Lesotho
1430	Namibia
1440	South Africa
1450	Swaziland
1500	**West Africa**
1510	Benin, People's Republic of
1505	Cape Verde
1515	Gambia
1520	Ghana
1525	Guinea
1530	Guinea-Bissau
1535	Ivory Coast
1540	Liberia
1545	Mali
1550	Mauritania
1555	Niger
1560	Nigeria
1565	St. Helena
1570	Senegal
1575	Sierra Leone
1580	Togo
1585	Upper Volta

2000	ASIA (South and East)
2100	**East Asia**
2110	China, People's Republic of
2130	Hong Kong
2140	Japan
2150	Korea, Democratic People's Republic of
2160	Korea, Republic of
2170	Macao
2180	Mongolian People's Republic
2120	Taiwan
2200	**South Central Asia**
2205	Afghanistan
2210	Bangladesh
2215	Bhutan
2220	India
2225	Maldives, Republic of
2230	Nepal
2235	Pakistan
2240	Sikkim
2245	Sri Lanka
2250	Tibet
2300	**South East Asia**
2305	Brunei
2310	Burma
2320	Cambodia
2315	Indonesia
2325	Laos
2330	Malaysia
2335	Philippines
2340	Portuguese Timor
2345	Singapore
2350	Thailand
2360	Vietnam

3000	EUROPE
3100	**Eastern Europe**
3110	Albania
3120	Bulgaria
3130	Czechoslovakia

APPENDIX 6: Survey Materials

Joint Task Force
on Data Collection
AACRAO • IIE • NAFSA

October 24, 1979

Dear Colleague:

We are writing to request your continued cooperation in the Annual Census of Foreign Students in the United States.

The enclosed forms include major modifications in the data collection procedures developed by the Joint Task Force in recent years. These modifications are designed both to simplify reporting procedures and to collect more detailed information to be reported by IIE in Open Doors. A complimentary copy of the 1978/79 edition of Open Doors, now in production, will be sent to each institution participating in the census.

Our request to you this year involves three steps:

STEP 1: A preliminary reply postcard report of the total number of foreign students at your institution. Please fill out and return this postcard as soon as possible.

STEP 2: Completion of the simplified institutional data form. Please read the detailed instructions on the enclosed form.

STEP 3: Providing data at the individual student level either by filling out the form supplied or sending an appropriate student roster. Please read the detailed instructions for STEP 3 on the enclosed form.

STEP 3 has been added to the survey in order to meet the widespread demand for "correlated data". Such data would provide the basis for reports with much greater detail; e.g., the number of female Nigerians studying Agriculture or the number of Master's candidates studying Biology from Japan.

A special survey conducted earlier this year by IIE indicated that a majority of the institutions polled could provide us with such "correlated" or individual data. We ask now that you take the time to provide such data by filling out the form in STEP 3 or providing a roster with comparable information.

We would appreciate your mailing the STEP 1 postcard by November 16, 1979 and the forms for STEP 2 and STEP 3 by December 19, 1979 to: Statistical Research Unit, IIE, 809 U.N. Plaza, New York, NY 10017. Any questions regarding the survey may be addressed to Douglas Boyan at this address or at (212) 883-8476.

AACRAO, IIE, and NAFSA are indebted to the thousands of Foreign Student Advisors, Registrars, and other officials who have provided invaluable assistance in the conduct of the Annual Census in the past. We look forward to your continued cooperation.

Sincerely,

Elbert W. Ockerman — Wallace B. Edgerton — Charles W. Gay

STEP 3 INSTRUCTIONS

(Reporting Official)

(Title/Office)

(Institution)

(City) (State) (Zip)

The attached label should include the Reporting Official, Title/Office and the institution's name and address. Please make any necessary changes.

In STEP 3, the Joint Task Force is asking institutions to provide **individual data** (without actually identifying student names) in order to allow much more detailed reports on the foreign student population in the United States. Only with **individual data** can reports be prepared indicating, for example, the number of female Nigerians studying Nursing or the number of Master's candidates studying biology from Japan.

The collection of **individual data** is an enormous undertaking requiring the processing of tens of thousands of individual records (as opposed to some 2,800 institutional records in recent years). Its success is largely dependent on the care taken by each institution to provide that data in a manageable form.

- ••• INCLUDE ONLY NON-IMMIGRANT FOREIGN STUDENTS AT THE POST-SECONDARY LEVEL
- ••• ALL INFORMATION SHOULD BE BASED ON THE FALL TERM, 1979
- ••• DEADLINE FOR THE RETURN OF THIS FORM: DECEMBER 19, 1979

INSTRUCTIONS CONTINUED ON PAGE 2

STEP 3 INSTRUCTIONS (Continued)

A. HOW TO REPORT INDIVIDUAL DATA

1. The preferred format for reporting **individual data** is by filling out the form on Pages 3 and 4. If your institution has more foreign students than will fit on this form, please photocopy Page 4 as many times as necessary to include all students.
2. The **preferred order** for the **individual data** is to list students by country, within country by field of study, within field of study by academic level, etc. If you have two or more students with **identical characteristics**, then list them once and put their number in the first column as in the following illustration:

STEP 3
Individual Data

ANNUAL CENSUS OF FOREIGN STUDENTS – 1979/80
Joint Task Force On Data Collection: AACRAO/IIE/NAFSA

PAGE 3

NUMBER OF STUDENTS	COUNTRY OF CITIZENSHIP	FOR IIE USE ONLY	FIELD OF STUDY (Please be specific e.g. Electrical Engineering, Accounting, Dentistry, etc.)	FOR IIE USE ONLY	ACADEMIC LEVEL (See Code Below)	SEX (Place X in appropriate box) M	SEX F	YEAR OF BIRTH
1	Germany		Finance		04	X		1950
1	India		Electrical Engineering		05		X	1957
3	Iran		Petroleum Engineering		05	X		1956
2	Iran		Petroleum Engineering		05	X		1954
1	Iran		Nursing		08		X	1952
1	Mexico		Mathematics		04	X		1953

B. ALTERNATIVE MEANS TO REPORT DATA: ROSTER REPORTS/COMPUTER PRINTOUTS

If your institution has too many students to report on the supplied form, IIE will accept computer printouts, directories, or rosters of foreign students.

However, in order that we be able to manage this data, we strongly urge you to have those rosters produced in the format and order described in A(above). If you are unable to produce a report in precisely that order, a report grouping students by any other of the five characteristics will facilitate our data management task.

- • • IF THE REPORT CONTAINS CODES OR ABBREVIATIONS, PLEASE INCLUDE A KEY FOR DECODING
- • • IF THE REPORT INCLUDES STUDENTS ON IMMIGRANT VISAS (PERMANENT RESIDENTS) AND THEY CANNOT BE EXCLUDED, PLEASE IDENTIFY THEM
- • • PLEASE HAVE ANY COMPUTER PRINTOUT TRIPLE SPACED, IF POSSIBLE, TO ALLOW ROOM FOR CODING BY IIE
- • • IF YOU SEND A REPORT, PLEASE ATTACH THE LABEL FROM PAGE 1 OF THIS FORM

If you or your data processing department have any questions regarding the provision of data in printouts or on computer tape, please contact Douglas Boyan at IIE (see below).

ANY QUESTIONS SHOULD BE DIRECTED TO: Douglas R. Boyan, Manager, Statistical Research, IIE, (212) 883-8476

STEP 3 SHOULD BE RETURNED BY DECEMBER 19, 1979 TO:

STATISTICAL RESEARCH UNIT
INSTITUTE OF INTERNATIONAL EDUCATION
809 United Nations Plaza
New York, N.Y. 10017
